Summary

Detail-oriented Frontend Developer specializing in **state management** and **API optimization**. Proven ability to **enhance user experience** and **mentor team members**, fostering a collaborative and high-performance development environment.

Skills

- Next.js and React.js
- Redux state management
- RESTful API integration
- Responsive web design
- SCSS and Bootstrap
- Tailwind CSS

Experience

FeedSpot | Borivali (Mumbai)

Front End Developer (July 2024 – Current)

- **FeedSpot Reader (React.js | SCSS | Bootstrap | Vanilla Redux):** A modern RSS Feed Reader that lets users follow blogs, news, and podcasts in one place. Maintained and improved its legacy codebase, fixed bugs, introduced new features, and enhanced UI/UX with subtle CSS animations. [Link]
- **FeedSpot RSS Builder (Next.js | React.js | SCSS | Redux toolkit**): An application that lets users create custom RSS feeds from any website. Built the entire frontend from scratch and optimized its logic for better performance and user experience. Added server-side rendering (SSR) to improve SEO, which helped increase the subscriber count by 30% during its MVP stage. [Link]
- Assisted in **onboarding** and **mentoring** junior developers, providing guidance on project structure, best practices, and code reviews.

Education

B.E. Comp. Eng. – CGPA 8.9

April 2024

St. Francis Institute of Technology, Borivali, Mumbai, India
